B. DISCUSSION OF SPECIFIC ACTIVITY	
1. Proposed Scope of Work (See FAQs)	
(a) Provide a detailed scope of work that fully describes the project or program for which funding is requested, including:	
<ul style="list-style-type: none"> • Need, purpose, and objectives 	
Project Need (include cost of No Action):	
<p>The Alabama Department of Transportation, Baldwin County, and the cities of Spanish Fort, Daphne, Fairhope, Orange Beach, and Gulf Shores are cooperatively pursuing the completion of five major infrastructure projects that have long been needed in the Gulf Coast Region. These corridors have long been identified for needed capacity improvements to reduce congestion and enhance access to and between the surrounding areas. According to the University of Alabama Center for Business and Economic Research, Baldwin County's population is expected to grow by 65% from 2010 to 2040. The proposed program of projects contributes to the economic resilience of the Gulf Coast and the State of Alabama. Tourism, industrial growth, and public safety are supported and enhanced through the completion of this project.</p> <p>Cost of "No Action": Baldwin County continues to grow rapidly. Failing to upgrade already congested corridors will leave key corridors operating with much higher congestion and delay in 2040. These delays create real costs for the local economy in the form of lost time for motorists and inhibiting the transport of good and services. These delays will also inhibit "normal" emergency services, major storm event evacuations, and recovery response services.</p>	
Project Purpose:	
Upgrade long under-performing state corridors in the State's fastest growing county.	
Project Objectives:	

The project partners seek to leverage funding from three major sources to add additional lanes to three major state routes in five separate projects, totaling 18.31 miles of capacity improvements. The improvements will greatly enhance the functionality of key Gulf Coast corridors.

- How the project/program meets the identified primary activity designated in A1

This program of projects will enhance several critical infrastructure links in the Gulf Coast region. The projects support our tourism industry on the Gulf Coast and also provide additional opportunities for access to the state parks including the Gulf State Park facilities, access to the gulf coast seafood industry, and enhanced transportation for economic growth.

- Specific tasks, milestones and related timeframes (Needs to directly correspond to information provided in the Restore Act Milestones Report (See sample in FAQs)

Projects 1 and 2 will be funded entirely by ALDOT and with the State of Alabama BP Economic Damages Settlement funds. Projects 3 and 4 will be funded by all ALDOT, Settlement Funds, and the RESTORE Act Pot 1 funding requested in this application. Project 5 will be funded by ALDOT and the RESTORE Act Pot 1 funding requested in this application. 4. Best Available Science

Directions: If the answer to the following question is "yes" complete this section.

Is the proposed activity designed to protect or restore natural resources?

Yes

No

The RESTORE Act requires activities designed to protect or restore natural resources to be based on the "best available science," which is defined in the Act as science that (a) maximizes the quality, objectivity, and integrity of information, including statistical information; (b) uses peer-reviewed and publicly available data; and (c) clearly documents risks and uncertainties in the scientific basis for such projects.

The applicant must make a determination that a project designed to protect or restore natural resources is based on the best available science. In order to support this determination, the applicant must clearly state the protection or restoration objective(s) of the project, describe the methods that will be used to achieve the objective(s), and explain how these methods are based on best available science. The response must be sufficiently detailed for Treasury to evaluate the reasonableness of the applicant's determination that the project is based on best available science. In addressing the three-pronged test in the definition of "best available science," the applicant must cite, when available, peer-reviewed, objective, methodologically sound literature sources that support the conclusion that the proposed scope of work is an effective way to achieve the stated objectives.

For each literature source cited, the applicant must provide sufficient citations, including:

- Title;
- Journal in which the literature source appeared, if applicable;
- Publication date;
- Author(s); and
- Web address if downloaded or available online.

N/A

The applicant must provide written answers to all of the following:

(Submission of source materials will not satisfy the requirements for answering this question.)

- A summary of the peer-reviewed information that justifies the proposed objectives, including methods used for the proposed activity. If peer-reviewed literature sources are unavailable, the Applicant must explicitly State this and provide A brief explanation of what alternative scientific information sources were used. If the Applicant relied on publicly available data, the Applicant must cite the source of the data, the date of collection, and the size of the data set. Whenever possible, the Applicant should use publicly available data from sources such as State agencies and federal agencies, for example the U.S. Census Bureau, U.S. Fish and Wildlife Service, Environmental Protection Agency, National Oceanic and Atmospheric Administration. The Applicant must provide a link to each publicly available data source used.

N/A

- A summary of how the applicant's methods reasonably support and are adaptable to Gulf Coast Region if the information supporting the proposed activity does not directly pertain to the Gulf Coast Region.

N/A

- A summary of an evaluation of uncertainties and risks in achieving the project's best available science objectives over the longer term; e.g., is there an uncertainty or risk that in 5-10 years the project/program will be obsolete or not function as planned given projections of sea level rise or other environmental change such as in freshwater inflows to estuaries?

N/A

- A summary of the literature sources' conclusions and any uncertainties or risks in the scientific basis that would apply to the proposed activity, including any uncertainties or risks that were identified by the public or by a Gulf Coast Ecosystem Restoration Council member.

N/A

5. Key Personnel

Directions: Key personnel should include the applicant's Authorizing Official who is authorized to sign the grant application and award, the Project Director who is responsible for the project, and the Financial Officer who is responsible for maintaining the accounting and financial records of the grant. Please provide an Organizational Chart.

Joey Nunnally, P.E., County Engineer Matthew S. Brown, Design Engineer William Duggar, Chief Hwy Accountant

6. Possible Material Risks to Implement and Maintain the Proposed Activity

Directions: List the possible material risks, e.g., operational, legal, regulatory, budgetary, or ecological risks, with a brief discussion of mitigation strategies that the applicant may need to address in order to implement and/or maintain the proposed activity. If the applicant determines that there are no material risks to implement and maintain the proposed activity, then put 'None' in the Risk column below.

Risks:

Permitting will need to be completed for projects and right-of-way will need to be acquired. Both phases come with potential obstacles such as property owners refusing to sell and difficulties obtaining final approval on environmental permits.

Mitigation Strategy:

For right-of-way, ALDOT is prepared to initiate condemnation proceedings as necessary. ALDOT will work closely with environmental agencies and, if necessary, make appropriate accommodations to ensure receipt of environmental permits.

7. Permits, Land Acquisition, Construction, and Relocation Assistance

Directions: Answer the following items concerning permits, construction, land acquisition, and relocation assistance, if applicable.

(a) Permits

Does the proposed activity require any federal, tribal, state, or local permits? For potential federal permits needed, see: (<https://www.permits.performance.gov/tools/federal-environmental-review-and-authorization-inventory>). If yes, list the specific federal, tribal, state, or local permits required for this project and the status of the permits:

Project 5 (SR 181; SR 104 to CR 32) – See attached.

8. Additional Project-Specific Factors

- Please discuss the proposed project's short-term and long-term benefits

In the short term, the construction and consultant costs related to the projects will rapidly circulate to the regional economy and will generate short and long-term jobs. In the long term, this program of projects invests in the future of coastal Alabama, building resiliency through increased economic opportunities, revenue generation, and public safety. The completed transportation links will ultimately contribute to the economic resilience of our Gulf Coast and the State of Alabama. The completed projects will also enhance the access of local residents and tourist to safety services and evacuation routes.

- The purpose of the RESTORE Act is to provide funding for ecological and economic recovery efforts for damages incurred as a result of the Deepwater Horizon Oil Spill. Please discuss how the proposed project's implementation will prevent any adverse impacts elsewhere.

These new corridor links will increase the overall resiliency of the Alabama Gulf Coast by helping tourists access Alabama natural resources while also providing residents and tourists with better access to the Gulf Coasts wonderful natural resources. The projects will be constructed in compliance with state and federal environmental laws to ensure that the project benefits are realized with no adverse impacts elsewhere.

- Does the proposed project expand or promote an existing industry or offer diversification? If so, please explain:

Yes, the projects provide enhanced access to and from Gulf tourist areas and the rapidly growing areas along the Eastern Shore.

- Does the proposed project create short-term job opportunities? If so, how many? Please justify:

The design and construction phases for each of the five projects will result in numerous short-term job opportunities.

- Does the proposed project create long-term job opportunities? If so, how many? Please justify:

No, but the enhanced access to tourism and the growing Eastern Shore will greatly enhance opportunities to recruit and develop long-term jobs in the region.

- Please discuss how the proposed project will be sustained post-implementation including any annual recurring costs

After the ultimate construction of the project, each of the State Routes will be maintained by ALDOT. The expected recurring annualized cost of this maintenance of the state routes is expected to be \$792,872. A portion of the SR 180 West project will be maintained by the City of Gulf Shores which is expected to cost \$204,000 per year.

- Please discuss how the proposed project will use cutting-edge technology (i.e., LID, LEED, permeable surfaces)

Project 1 (SR 181; CR 64 to SR 104) will incorporate some low impact development (LID) design features.

- Because the Gulf Coast Restoration Trust Fund will receive deposits over a 15-year period, the Council may consider funding projects in phases. In the event this proposed project is not fully funded, please discuss how the project might be implemented in phases. Keep in mind each phase must result in a stand-alone product.

This overall project will be implemented in several phases/projects. The time to complete all 5 projects is estimated to be 4-6 years.

1.3 ENDANGERED SPECIES ACT (ESA)

A consultation pursuant to Section 7 of the Endangered Species Act and/or a permit and conservation plan pursuant to Section 10 may be required based on the answers to the following questions:

- 1) Will the proposed activity occur in proximity to threatened or endangered species or critical habitat as defined by the ESA and under the jurisdiction of the National Marine Fisheries Service (NMFS) (<http://www.nmfs.noaa.gov/pr/laws/esa/>) or the U.S. Fish and Wildlife Service (USFWS) (<http://www.fws.gov/endangered/>)?

Yes No

- 2) Will the proposed activity potentially affect threatened or endangered species or critical habitat as defined by the ESA and under the jurisdiction of NMFS or USFWS?

Yes No

If the answer to either of these questions is "yes," or you are unsure, contact the regional office of USFWS (<http://www.fws.gov/offices/>) and/or NMFS (<http://www.nmfs.noaa.gov/>) to determine if consultation is required. Most consultations are conducted informally with the federal agency or a designated non-federal representative. Non-federal representatives may be involved in the informal consultation process and may request and receive species lists, prepare the biological assessment, and provide information for the formal consultation. However, the USFWS requires the action agency to designate formally the non-federal representative in writing. Moreover, the ultimate responsibility for Section 7 obligations remains with the action agency. Additional information concerning Section 7 consultations can be found in the Endangered Species Act Consultation Handbook at: <http://www.fws.gov/policy/m0002.html>. Additional information concerning Section 10 permits and conservation plans can be found at: http://www.nmfs.noaa.gov/pr/permits/ESA_permits.html.

1.4 MIGRATORY BIRD TREATY ACT AND BALD AND GOLDEN EAGLE PROTECTION ACT The Migratory Bird Treaty Act makes it illegal for anyone to take, possess, import, export, transport, sell, purchase, barter, or offer for sale, purchase, or barter, any migratory bird, or the parts, nests, or eggs of such a bird except under the terms of a valid permit issued pursuant to Federal regulations. The migratory bird species protected by the Act are listed in 50 C.F.R. 10.13. The Bald and Golden Eagle Protection Act prohibits anyone, without a permit issued by the Secretary of the Interior, from "taking" bald eagles [or any golden eagle], including their parts, nests, or eggs. The Act defines "take" as "pursue, shoot, shoot at, poison, wound, kill, capture, trap, collect, molest or disturb." A permit may be required based on the answers to the following questions:

- 1) Will the proposed activity affect any migratory bird species protected by the Migratory Bird Treaty Act?

Measure #: Starting with 1, number each performance measure.

Measure: An indicator of success toward reaching a goal. This should reflect "how the applicant will evaluate success" from the narrative of an accepted multiyear plan.

Baseline: The starting point of the measure. It is the status quo without the grant award.

Target: The anticipated result of the measure. It is the anticipated new status with the grant award.

Date: It is the anticipated date for reaching the target.

Progress toward target (reporting period/cumulative): Leave blank on the initial report. For subsequent reports, record progress made during the reporting period and progress made from the start date of the grant award through the current reporting period.

Status/Next Steps: Briefly describe specific progress and/or challenges related to the measure.

RESTORE Act Direct Component Applicant Certifications Department of the Treasury

OMB Approval No. 1505-0250

Directions: These certifications are required by federal law and Department of the Treasury (Treasury) regulations to be submitted with each application to Treasury for financial assistance under the RESTORE Act Direct Component. The certifications must be signed by an authorized senior official of the Applicant who can legally bind the entity and has oversight for the administration and use of the Direct Component funds.

2. Each activity funded under this Agreement is designed to carry out one or more of the eligible activities for the Direct Component.
3. Each activity funded under this Agreement was selected after consideration of all meaningful input from the public, including broad-based participation from individuals, businesses, Indian tribes, and nonprofit organizations, as described in the grant application.
4. Each activity funded under this Agreement that protects or restores natural resources is based on the best available science, as that term is defined in 31 C.F.R. Part 34.
5. This recipient has procedures in place for procuring property and services under this award that are consistent with the procurement standards applying to Federal grants. This recipient will not request funds under this award for any contract unless this certification remains true and accurate.
6. Pursuant to 2 C.F.R. § 200.303, this recipient will establish and maintain effective internal control over any award made based on this application that provides reasonable assurance that this recipient is managing the award in compliance with Federal statutes, regulations, and the terms and conditions of the award. No material deficiencies in this recipient's internal controls are known.
7. A conflict of interest policy consistent with 2 C.F.R. § 200.318(c) is in effect and covering each activity funded under this Agreement.
8. This recipient will comply with Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, and all other applicable federal laws and regulations concerning anti-discrimination.

I make each of these certifications based on my personal knowledge and belief after reasonable and diligent inquiry, and I affirm that this Applicant maintains written documentation sufficient to support each certification made above, and that this Applicant's compliance with each of these certifications is a condition of this Applicant's initial and continuing receipt and use of the funds provided under this Agreement.

B. Certification Regarding Debarment, Suspension, and Other Responsibility Matters -- Primary Covered Transactions

Instructions: The inability of an applicant to provide the certification required below will not necessarily result in the denial of participation in

this covered transaction. The prospective Applicant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with Treasury's approval of the proposed Application. However, failure of the Applicant to furnish a certification or an explanation shall disqualify such person/entity from participation in this transaction. Please be advised of the following:

1. This certification is a material representation of fact upon which reliance is placed when Treasury determines to enter into this transaction. If it is later determined that the Applicant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal government, Treasury may terminate this transaction for cause or default.
2. The Applicant shall provide immediate written notice to Treasury if at any time the Applicant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
3. The terms "covered transactions," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal", and "voluntarily excluded," as used in this clause (certification), have the meanings set out in the Definitions and Coverage sections of the rules implementing Executive Order 12549. You may contact Treasury for assistance in obtaining a copy of those regulations (31 C.F.R. Part 19).
4. The Applicant agrees by submitting this Application that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by Treasury.
5. The Applicant further agrees by submitting this Application that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," to be provided by Treasury, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions (see 31 C.F.R. Part 19, Appendix).
6. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.
7. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
8. Except for transactions authorized under paragraph 4 of this certification, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended,

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.
